

Asthma Criteria

To complete the Asthma Criteria “focus area” this year you must complete three of the following criteria. The first criterion is required.

- 1. Develop a system to track students with asthma (required).**
2. Attend asthma basics training for all faculty and staff.
3. Promote Utah’s Asthma Inhaler Law and use of the mandatory Self-Administration Form.
4. Utilize the online WinningWithAsthma.org program to educate all physical education and extracurricular athletic faculty members.
5. Complete another project, which the UDOH Asthma Program has approved.

When your school chooses to focus on asthma health for the year, please let us know! We have lots of resources and materials already developed.
